PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience in building scalable applications using modern technologies. Known the foundation in Python Programming principles. Experienced in problem-solving, code quality and working effectively with teams using agile methodologies. Passionate about writing clean, maintainable code and continuously improving system performance and reliability.

TECHNICAL SKILLS

Languages: Python, SQL, HTML5, CSS3

Backend: Python, PHP, Django

Frontend: HTML, CSS, JS

Database: SQL, Power Bi

Tools & Platforms: GitHub, Pythonanywhere, Vercel, Render, VS Code, CI/CD

Core Concepts: Full-Stack Development, Data Structures & Algorithms (DSA), Real-Time Applications, Authentication, Responsive UI Design

PROFESSIONAL EXPERIENCE

Software Developer Intern | VVnT Solutions

Jun 2026 – Present

Noida, India

- Developed and debugged web application components, identifying and resolving issues to improve functionality and system stability
- Participated in code reviews with team members, providing and receiving feedback to maintain code quality and consistency
- Assisted in documentation of software components and supported team in maintaining scalable application architecture
- Worked in agile environment, collaborating with cross-functional teams to understand requirements and contribute to system design

Full-stack Development Intern | Cognifyz IT Solutions Pvt. Ltd.

Jul 2026

Noida, Uttar Pradesh (Remote)

- Full Stack Development: Working on diverse projects involving both front-end and back-end technologies to deliver seamless web applications.
- Developed responsive full-stack features, connecting frontend interfaces with robust backend APIs.
- Leveraged problem-solving, project management, and quality control to meet project goals and maintain performance.

Python Developer | CodSoft

Aug 2025 – Sep 2025

Noida, Uttar Pradesh (Remote)

- Educational internship focused on learning and developing new skills and gaining hands-on knowledge in Python & Django.
- Developed backend application features and web utilities using Python, Django framework, and SQLite database.
- Focused on learning new skills, writing clean code, and adhering to modern Python coding best practices.

PROJECTS

Kisanlog | Python, Django, HTML, CSS, JS, SQLite |

[Live URL](#)

A responsive full-stack agricultural platform developed using Django and Bootstrap 5 to bridge the gap between farmers and local markets.

- Built a full-stack marketplace where farmers can list their crops, view real-time market/mandi prices, and connect directly with buyers.
- Developed secure Django session-based authentication, custom user dashboards for farmers, and integrated a weather forecasting API to help plan harvesting.
- Integrated Django and SQLite to manage structured relational database models for crop listings, customer details, and order tracking.

Cube Service | Python, Django, HTML, CSS, JS |

On-demand home services marketplace for local service booking and professional service-provider management

- Built an on-demand home services marketplace with dynamic service booking, scheduling and provider allocation features.
- Integrated Google Gemini AI to analyze user queries and generate automated service recommendations, cost estimations and customised care plans.
- Developed secure protected routes and role-based access control for users, service providers and admins.
- Implemented relational database models for service management and scalable backend APIs with production-ready deployment on Render.

Thik Hoga Saab | Python, Django, HTML, CSS, JS |

[Live URL](#)

On-demand healthcare platform for local doctor consultation booking and professional medical service-provider management.

- Developed a digital healthcare ecosystem that facilitates seamless doctor-patient interactions, real-time slot bookings and digital prescription tracking.
- Leveraged Google Gemini AI to power an intelligent symptom-checker module, delivering preliminary health insights and lifestyle guidance based on user queries.
- Architected a multi-tier authentication system with strict role-based permissions tailored for patients, healthcare providers and clinic administrators.
- Engineered robust medical-data schemas using Django models, ensuring HIPAA-aligned secure data handling and smooth deployment via Render.

KEY ACHIEVEMENTS

- Successfully built and deployed multiple full-stack web applications using Python, Django frameworks and seamless checkout workflows.
- Earned industry-recognised certifications in Python Programming, Data Science & Analytics and SQL from platforms like LetsUpgrade, Deloitte, TATA Forage and HP LIFE.
- Applied basic DSA and Database concepts to manage data effectively, improve website performance and provide a better user experience.
- Participated in the Internal Campus Hackathon at Maharishi University of Information Technology, collaborating in a team to brainstorm and develop innovative software solutions.

EDUCATION

Bachelors In Computer Applications

Maharishi University Of Information Technology (2023-2026)

Higher Secondary Education (NIOS)

(2022-2023)

Secondary Education (CBSE)

Maharishi Vidya Mandir (2020-2021)
